

CREST: Continuing Project Momentum

When is this tip sheet needed?

When winding down a CREST award (3 of 7).

Concept

Project momentum is a variable that should be independent of NSF support. In a sense it is more liberating because it may not be bound by the same restrictions of the Cooperative Agreement. It is the reward of all the efforts you have put into promoting the Center and building lasting relationships on campus and in the community.

Management Considerations

- ❑ [This section under revision. Consult CREST program staff.]
- ❑ Review the notes under Administrative Conditions.

Administrative Considerations

- ❑ [This section under revision. Consult CREST program staff.]

What's Next?

Whether at the end of phase I or phase II CREST support, full of momentum or not, a final project report is due to NSF via FastLane. >>> [NEXT \(Final Project Reporting\)](#)
